***Allowance***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 1-7-09 has been entered.

***Information Disclosure Statement***

2. The information disclosure statement (IDS) submitted on 1-7-09 was filed after the mailing date of the Notice of Allowance on 10-7-08. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

***Allowance***

3. Claims 1, 2, 5-8, 14, 17, 18, 21-24, 30, 34-37 are pending and allowed in the application. Please see the reasons for allowance below.

***Reasons for Allowance***

Art Unit: 3623

4. The following is a statement of reasons for the indication of allowable subject matter:

As for independent **Claims 1, 14, 17 and 30**, none of the prior art of record, taken individually or in any combination, teach, inter alia, creating a forecast series that includes a set of parameters defining the forecast identifying opportunity data corresponding to members of an organization that has a hierarchy of management levels; associating revenue data with identified opportunity data to create at least one revenue schedule containing a plurality of entries; providing a plurality of visual adjustment patterns in graphical shapes displaying a corresponding plurality of member-selectable adjustment values, where selecting a visual adjustment pattern by a member of the organization results in an automatic application of the corresponding member-selected adjustment value to a member-selected entry in a revenue schedule, in a manner depicted by a shape of the selected visual adjustment pattern; calculating a forecast associated with the forecast series and corresponding to the members of the organization using the identified opportunity data and the revenue schedule; defining visibility rules that specify the forecast data corresponding to the members of the organization that are visible to a first member of the organization having at least one subordinate member, where the visibility rules are defined according to the position of the first member in the hierarchy; and generating a forecast for the first member of the organization using the set of parameters in the forecast series and based on a forecast submitted by said at least one

Art Unit: 3623

subordinate member who is required to provide corresponding subordinate member-level forecast to said first member, where the data used for said generating the forecast for the first member is limited to forecast data corresponding to the members of the organization according to the visibility rules and where a forecast for said at least one subordinate member is automatically generated when said at least one subordinate member fails to submit a forecast prior to generation of the forecast for the first member who is a manager, and the visibility rules include a maximum hierarchy depth search value  $n$  defining a search scope such that the forecast for the manager is generated from the manager's own forecast data and from forecast data corresponding to members of the organization who are defined to be both subordinate to the manager and occupy a management level in the hierarchy that is  $\leq n$  levels below a management level occupied by the manager.

The prior art references most closely resembling the Applicant's claimed invention are Sultan (US 6,804,657) and Gozdeck et al. (U.S. 6,636,852).

Sultan teaches a method for sales forecasting based upon a pipeline of sales opportunities in the firm. Gozdeck teaches a sales force compensation tracker that tracks sales opportunities and progress against those opportunities to determine progress against that plan. While the individual references teach some of the limitations, as noted in the file history, one of ordinary skill in the art would not combine the references to teach the claimed invention as a whole with

Art Unit: 3623

a reasonable expectation of success. The combination of the cited references do not teach the claimed limitations as a whole to render the claimed limitations obvious, i.e. to achieve a predictable result.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
